## guide lines

Aim to at least meet WCAG 2.1 level AA requirements.

Remove unnecessary styles, information, and decisions to reduce distractions

Maintain consistency by ensuring that similar elements look and work in a similar way

Use conventional design patterns that people are familiar with

Break up information into smaller groups to clearly show relationships and speed up decision making

Reduce the number and complexity of choices

Make similar elements look and work in a similar way

Aim to design interfaces in a modular way

Avoid unnecessary lines, colours, backgrounds, and animations to create a simpler, more focused interface

Use changes in opacity to indicate interaction states

Make related elements look similar by giving them similar visual characteristics

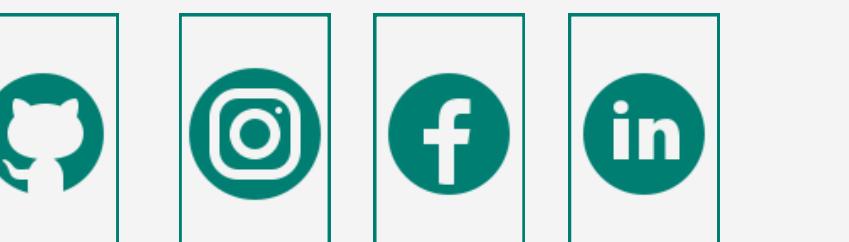

Create a design system

Create a clear visual hierarchy to show the level of importance of information

# Hello I am Yedi Worku and I am software Developer

i am a third year software  
Engineering student at Addis  
Ababa, and i am  
actively doing both front-end and  
back-end development

## my cv & interests

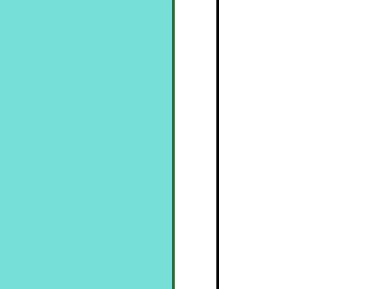

### Frontend Development

hobbies is building frontend websites using HTML, CSS, and JavaScript. I find immense satisfaction in seeing a project come to life after hours of work and attention to detail. It's this passion that drives me to continuously improve my skills and create visually appealing, functional websites.

### Back-End Development

"I'm passionate about backend development, building scalable and efficient server-side applications. I enjoy working with databases and APIs, ensuring smooth data flow between the server and user interfaces. My focus is on creating high-performance systems that support seamless user experiences."

## Education

I am currently studying Software Engineering at Addis Ababa University, in my third year

## adventure

I find peace and inspiration in the outdoors, especially during long hikes that allow me to disconnect and reconnect with nature. The beauty of the world around us—whether it's a breathtaking view from a mountaintop or a quiet moment by a stream—reminds me of the wonder and creativity that God has provided. Hiking not only rejuvenates me physically but also sparks my creativity, offering new perspectives that enrich both my personal and professional life.

## Hobbies

reading book

### photography

I love capturing moments through photography. Each photo tells a unique story, preserving memories and the beauty of everyday life. Photography allows me to explore different perspectives of the world around me. Whether it's nature, portraits, or events, every click encapsulates a fleeting moment into something lasting. Through my lens, I am constantly learning and improving, experimenting with different techniques, lighting conditions, and compositions. This activity not only stirs my creativity but also provides a fulfilling avenue for self-expression.

long walk

Taking long walks or hiking is one of my favorite activities. It allows me to relax, reflect, and connect with nature. Long walks not only provide a great way to clear my mind, but they also serve as a form of exercise that keeps my body active. I enjoy discovering new trails and parks, each offering unique scenery and experiences. On these walks, I often reflect on life, set personal goals, or even indulge in a good playlist, letting the music be the soundtrack to my thoughts as I roam the paths
